Knowledge Is Power

Knowledge is supreme virtue that a man possesses. It is this attribute that distinguishes man from other creatures and place him on a much higher plane. An illiterate but brawny person

might overpower a lean but knowledgeable person, in spite of this, knowledge remains unconquered and undefeated. Famous British philosopher and jurist of Middle Ages Sir Francis Bacon (1561-1626) once uttered the ostensibly unpretentious but profoundly eloquent words *Knowledge is Power*. Today some four hundred years down the line this proverb assumes high significance. This is to stress that a knowledgeable person is at much ease to control the circumstances around him. The instrument that comes in handy to triumph over the unfavourable situation is, mind you, not the might but the intellect. The physical strength is, of course, one among the countless Divine bounties. However, this alone is insufficient to rule the world unless intellect compliments it. Thus, it is this golden combination that maketh a man a complete man.

Knowledge bequeaths man the power not only to control the forces of the nature but also utilise them to his benefit and advantage. It is the *power* of knowledge that enables man to unravel the mysteries of the universe. This power makes possible to dig deep and uncover the earth's secrets. It allows man to scale high rise mountains. It also facilitates man to travel into space and crack the puzzles of the cosmos. This power led to several breakthroughs in medicine and diseases control. The long march of science backed by power (of knowledge) is no way near culmination and will continue till eternity.

Notwithstanding the materialistic discourse contained in the preceding paragraphs there is another too important dimension of the *power* of the knowledge to be overlooked. And this all important paradigm relates to metaphysics and Divinity. All religions of the world lay great emphasis on knowledge. The very first revelation of Prophet Mohammad (PBUH) is about knowledge. He stressed "acquire knowledge from cradle to grave" and "travel as far as China in pursuit of knowledge." Knowledge occupies the highest place in the Vedas. Vedic seer prays to Lord Indra, "O Indra! Be educative to devotees so that destiny may not slip away". According to The Bible *the fear of Lord is the beginning of knowledge*. This is the true essence and the real *Power* of knowledge that serves as the guiding principle to know the Creator, the Lord, the Sustainer of the Universe.

The Alhikmah Foundation is perpetually engaged in this noble cause of knowledge dissemination through a bouquet of activities.

PUBLIC LECTURE-CUM-IFTAAR

Allah glorifies the month of Ramadan in the Holy Quran. This conspicuously establishes its superiority over other months. Ramadan is that auspicious month wherein Allah revealed the Holy Quran on Prophet Mohammad (P.B.U.H). And since we are the *Ummati* of Prophet Mohammad (P.B.U.H.), therefore, a greater responsibility lies on our shoulders. Maulana Aijaz Aslam, Chief Editor *Radiance Views Weekly Superiority of Ramadan* under the aegis of Alhikmah

Foundation organized at the Foundations headquarters Alhikmah Education Point, Zakir Nagar. Referring to the verse 183 of Chapter 02 *al-Baqara* Maulana Aslam asserted that the Fasting in the month of Ramadan has been made mandatory so that we may become *Muttaqi*.

Elaborating on the meaning of *Muttaqi* Maulana emphasized that the word carries a multitude of meaning. It implies God-fearing, righteousness, piousness, and self-restraint. He further pointed out that the factor that distinguishes the Holy month of Ramadan from the rest of the months is that Allah revealed Glorious Quran in this month. Therefore, it is incumbent upon us that we strike a balance between our inner and outer being and make them compatible with the teachings of the Holy Quran. On the occasion Maulana Aslam applauded the efforts of Alhikmah Foundation in propagating Quranic teachings.

Chairman of the Foundation Dr. Ziauddin Nadwi welcomed the guests and extended his heartfelt greetings for the Holy month of Ramadan. The Foundation also arranged for the Iftaar. The programme was well attended. Prominent among those present included Jb. Musharraf Husain Sb., Jb. Waseem Ahmad Sb., Jb. Mohammad Yusuf Sb., Dr. Shakeb Arsalan Sb., Jb. Adil Azmi Sb., Jb. MAN ON MISSION; MAN WITH MIDAS TOUCH

The talented team under the stewardship of Mohammad Abdul Lateef Khan, Chairman and Managing Director of Hyderabad based MS Education Academy which revolutionized the concept of education across the country. Khan started a coaching institute with only 15 students in 1990. However, in the first year, Khan had to face a loss of Rs 30,000, but he did not lose his heart. He continued his journey with same vigor and subsequently during the initial three years he faced the loss of more than one lakh rupees. Khan continued to pursue his engineering course and completed his BE in Electronics and Communication Engineering from Osmania University.

“Currently, MS Academy has 80 branches in 20 cities across eight different states with more than 27000 students enrolled. We have produced over 1200 MBBS doctors, 5000 engineers and shaped the life of 78000 youths who are alumni of our institutes”.

In 1998, Khan collaborated with renowned Urdu daily, *Siasat*, which started publishing model SSC exam papers which was widely accepted and became an instant hit. It resulted in popularizing his method of education and unique technique to crack medical and engineering examinations. In the year 2000 he opened his own school and named it MS Academy, with the aim to facilitate thousands of children with education. Khan introduced the junior school (intermediate) in the year 2002; they successfully produced their first batch in 2004, while their second batch (2005) grabbed the first position in the state of Andhra Pradesh.

We have produced over 1200 MBBS doctors , 5000 engineers and shaped the life of 78000 youths who are alumni of our institutes. Only this year 150 students from our institutions cracked NEET” he added. Khan, is a pioneer in integrating Modern and Islamic Education with academic excellence. Khan’s academy also has focused on modern and Islamic education. On this he said, “We stress on imbibing Islamic moral and values to shape the personalities that can lead tomorrow. Islamic environment facilitates Muslim students to compete and turn them into achievers.”

DNA SEQUENCING

DNA sequencing is the process of determining the precise order of nucleotides within a DNA molecule. It includes any method or technology that is used to determine the order of the four bases—adenine, guanine, cytosine, and thymine—in a strand of DNA. The advent of rapid DNA sequencing methods has greatly accelerated biological and medical research and discovery.

Knowledge of DNA sequences has become indispensable for basic biological research, and in numerous applied fields such as medical diagnosis, biotechnology, forensic biology, virology and biological systematics. The rapid speed of sequencing attained with modern DNA sequencing technology has been instrumental in the sequencing of complete DNA sequences, or genomes of numerous types and species of life, including the human genome and other complete DNA sequences of many animal, plant, and microbial species.

RADIOACTIVE FLUORESCENT AUTOMATED CHAIN-TERMINATION DNA SEQUENCING

The first DNA sequences were obtained in the early 1970s by academic researchers using laborious methods based on two-dimensional chromatography. Following the development of fluorescence-based sequencing methods with a DNA sequencer, DNA sequencing has become easier and orders of magnitude faster
